THE ULTIMATE WORKSPACE

Our 450F Fiber Optic Splicing Trailers offer a mobile, efficient, and safe workspace, enabling technicians to perform precise splicing operations on site. The 450F is built with an all-aluminum frame for extreme durability and features an adjustable coupler and extra ground clearance for off-road terrain. These models come standard with heating and cooling to keep you comfortable, and generous LED lighting provides the visibility you need. All models are equipped with a 4.5kw generator to keep you running no matter how long you're on the jobsite.
